THE ALL-NEW XC90

MILD HYBRID

WE ARE REDEFINING PERSONAL MOBILITY BY PUTTING PEOPLE FIRST.

At Volvo, we put people first by innovating and combining technologies to create richer, simpler driving experiences. By 2025, we aim to make 50% of our cars electrified. Together with leading tech partners, we're driving toward a smarter, more sustainable tomorrow.

Guided by 'Omtanke', the Swedish ethos of care and thought, we care for you and the world we share.

The Volvo XC90 embodies Scandinavian elegance with a new grille, low bumper, and chrome bars with a touch of glass. Automatic LED headlights with active High Beam and a panoramic glass roof enhance its striking presence, while T-shaped lights ensure a distinctive look day or night.

A NEW TAKE ON LUXURY.

The XC90's serene, uncluttered interior reflects modern Swedish luxury. Metal-finish air vents and on select variants, a crystal gear selector by Orrefors elevate its style, while sustainable materials reinforce its premium feel.

Enjoy elite sound with Bowers & Wilkins audio.

FIRST-CLASS COMFORT, ASSURED.

Accommodating up to seven passengers, every seat in the XC90 is individually adjustable. Front seats offer ventilation and massage functions for a truly premium experience. The second and third rows are raised so that everybody can enjoy the view.

Our Advanced Air Cleaner technology filters dust, pollen, and odours while monitoring air quality and closing the intakes if the pollutants are too high. Four-zone climate control lets rear passengers customize their climate settings via a dedicated touchscreen.

Our panoramic roof adds a superb experience of light and air. On sunny days, a power-operated sunshade reduces glare while maintaining the airy feel.

In the driver's seat you're in command with Control functions such as navigation and entertainment from the steering wheel buttons-or use voice control.

The four-zone climate system can be controlled from the centre display touch screen, or a graceful touch control panel at the end of the tunnel console.

A crystal gear selector by the Swedish glassmakers Orrefors delight the senses.

STAY CONNECTED AND IN COMMAND.

Stay seamlessly connected with your Volvo through the intuitive 11.2-inch touchscreen, just like using a smartphone.

Driving information is clear on the 12.3-inch driver display and head-up display, so you keep your eyes on the road.

Voice control lets you manage entertainment, navigation, and climate hands-free.

In a Volvo, you and your car are in perfect sync.

WE'RE PROUD TO PARTNER WITH GOOGLE.

We're the first to partner with Google, integrating an Android-powered infotainment system with built-in Google apps and services. Enjoy hands-free control of temperature, navigation, music, and messaging with Google Assistant. Access music apps and real-time traffic updates via Google Play and Google Maps. All Volvo cars with this system come with a 5-year standard Digital Services Package.

Just ask Google. Inside your Volvo.

*Google, Google Play, Google Maps and YouTube Music are trademarks of Google LLC. Google Assistant is not available in certain languages and countries. Sequences shortened and simulated. Display is for illustrative purposes only. Functions may vary between configurations and markets.

Google Play Stay connected to your digital life. Google Play in your XC90 lets you enjoy the apps and services that can make every journey more entertaining and convenient.

Best-in-class navigation With Google Maps seamlessly integrated in the XC90, real-time traffic info and automatic rerouting helps you reach your destination with less hassle.

Google Assistant Talk to Google in your XC90 for hands-free help. Easily get directions, enjoy entertainment and keep in touch with friends, family and colleagues— just say “Hey Google” to get started.

FEEL THE MUSIC.

Our audio philosophy is simple: it's about the soul of music.

Tailored to your Volvo's acoustics, the 1410W Bowers & Wilkins system with 19 high-end speakers, including a tweeter-on-top and air-ventilated subwoofer, delivers lifelike sound.

Experience music as it was meant to be heard.

PILOT ASSIST. DESIGNED TO MAKE DRIVING SAFER AND EASIER.

To make driving in demanding traffic less stressful, we created Pilot Assist and Adaptive Cruise Control. This means your Volvo automatically helps you maintain a safe distance from the car in front of you by adapting your speed while helping to keep you centred in the lane by automatically making small steering adjustments.

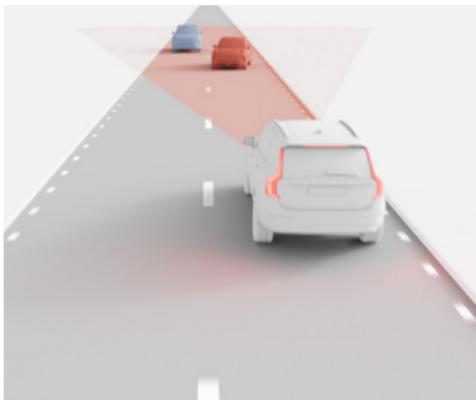

Please note: The driver is always responsible for how the car is controlled, the functions described here are only supportive.

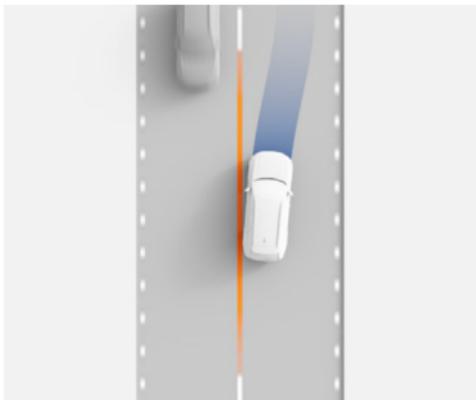

CITY SAFETY TECHNOLOGY: YOUR PROACTIVE PARTNER ON THE ROAD.

City Safety is at the core of our safety technologies, detecting vehicles, pedestrians, cyclists, and large animals—even at night. It warns you and, if needed, can automatically brake to help avoid or reduce collisions.

Our Oncoming Mitigation by Braking technology detects oncoming vehicles and brakes automatically to lessen the impact.

Oncoming Mitigation by Braking: A Volvo Cars safety world first, this innovation can detect vehicles heading towards you on the wrong side of the road.

Oncoming Lane Mitigation: Using automatic steering assistance, this system helps you avoid collisions with oncoming vehicles.

Run-off Road Mitigation: If Run-off Road Mitigation detects you're about to leave the road unintentionally, it can provide steering input and, if necessary, brake support to help guide you back on track.

Lane Keeping Aid: If you're about to cross a lane marking unintentionally, the Lane Keeping Aid can gently help steer your car back into its lane.

DESIGNED TO PROTECT.

Our unique whiplash injury protection helps protect your back and neck if your car is hit from behind. And in a run-off road scenario, the energy-absorbing front seat structure will help protect your spine in a hard landing, should the car become airborne.

Crash-absorbing front seats

The unique structure of the front seats in your Volvo helps to absorb vertical impacts, helping to protect your spine if the car lands heavily after leaving the road.

Volvo safety cage

The passenger compartment uses a high percentage of ultra high-strength boron steel to create a protective cage around everyone inside the car, while front and rear deformation zones help dissipate the crash energy.

Child safety

At Volvo Cars, we believe everyone in the car shall be equally safe. Our unique approach within child safety includes creating and carrying out tests based on real-life traffic situations, as well as testing our child seats* alongside our cars. With our latest range of child seats, we offer unparalleled protection.

*This is an accessory & does not come with the regular features of the car.

ENJOYING MORE, USING LESS.

With the perfect balance between performance and efficiency, every Volvo delivers a great drive with low fuel consumption and reduced emissions.

Lightweight, low-friction engine design and advanced boosting technology allow you to enjoy a smooth, agile driving experience. Smaller, lighter engines free up interior space and enhance the car's handling.

Our eight-speed Geartronic™ automatic gearbox maximizes engine potential, ensuring seamless shifts or manual control when desired.

BREATHE CLEAN AIR WITH WORLD-FIRST AIR QUALITY TECHNOLOGY INSIDE NEW VOLVO XC90

The company's new Advanced Air Cleaner technology comes with a sensor that measures PM 2.5 levels inside the cabin.

SUPREME CONTROL.

The XC90 combines refined comfort with precise handling through double wishbone front suspension and an innovative integral link rear axle.

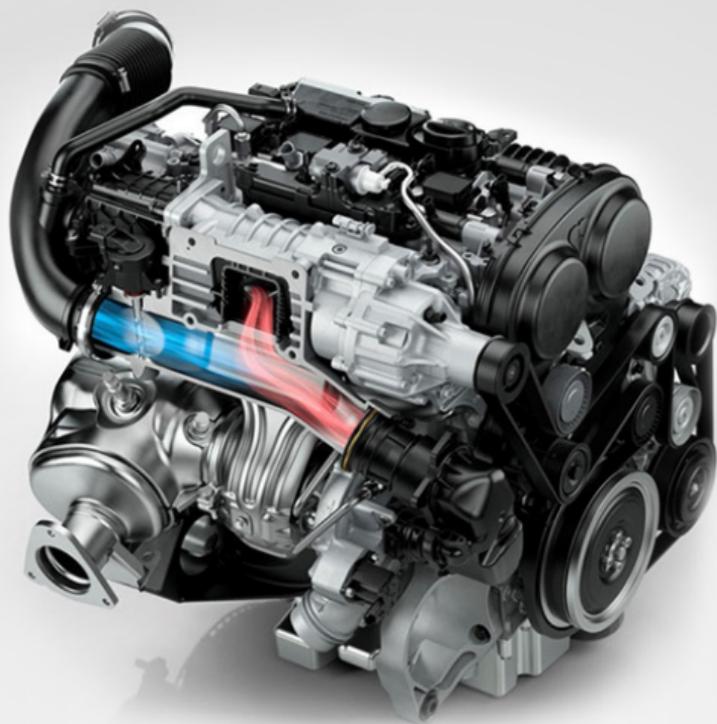

Support systems like Hill Start Assist and all-wheel drive ensure a confident journey on steep hills and challenging roads.

The available air suspension maintains ground clearance and allows for easier loading by lowering the rear by 50 millimeters by pushing a button inside the cargo area for easier loading.

The Four-C active chassis, an electronically controlled damping system, continually adjusts to road conditions for optimal comfort and control.

Air suspension on all four wheels gives the XC90 outstanding ride comfort - the air springs absorb up imperfections in the road - and make the car stable by keeping the ride height constant, regardless of the load. With the active chassis you can alter the way the car rides and handles to suit your mood or the road.

THE OPTIMAL MILLER ENGINE.

The innovative Miller engine is designed for fuel efficiency, reduced emissions, and meeting future fuel standards. The advanced Miller cycle improves thermal efficiency, leading to lower fuel consumption, enhanced turbocharging, and quieter operation.

Compatible with E20 fuel, it positions Volvo as a leader in sustainable luxury in India.

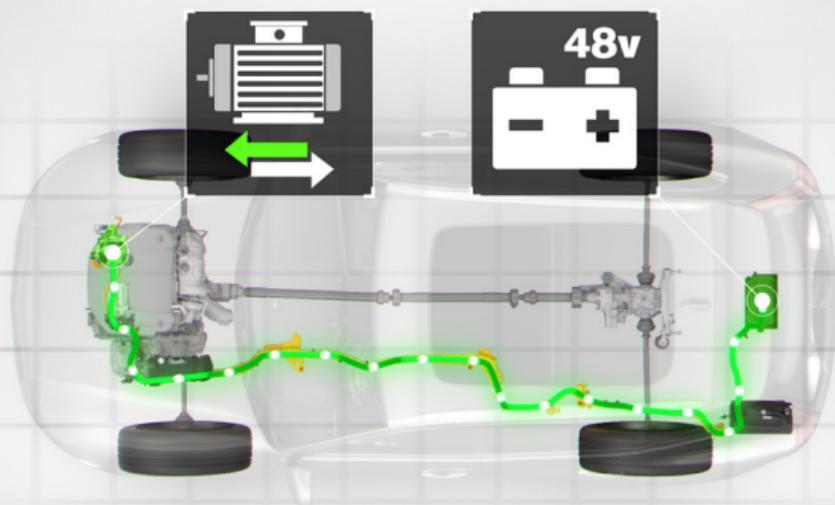

MILD HYBRID CARS

An integrated starter generator supports the car's petrol engine for a smoother drive with reduced fuel consumption and lower tailpipe emissions.

HOW DOES A MILD HYBRID CAR WORK?

Our mild hybrid cars recover brake energy to charge a 48V battery when braking. An integrated starter generator uses this energy to momentarily support the combustion engine. Together, this gives you a more fuel-efficient and smoother driving experience.

Smoother drive

The mild hybrid technology adds to a more refined driving experience. The engine restarts instantly and you can enjoy a smoother drive from a standstill.

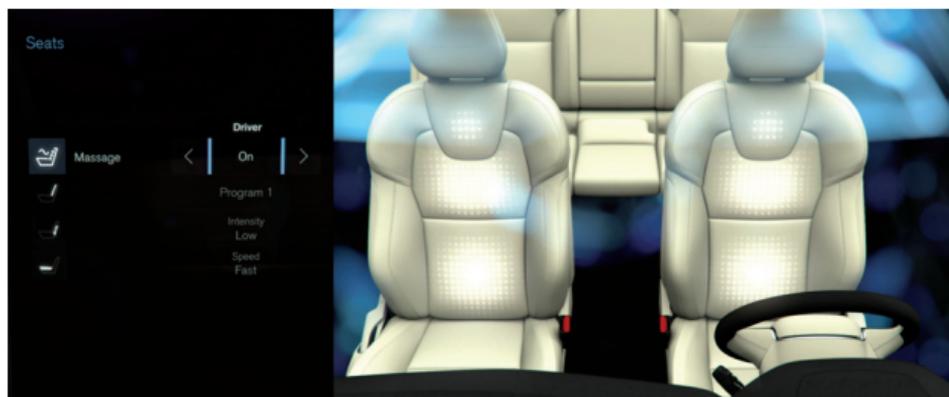

More power

Using recuperated electric energy, the integrated starter generator boosts the combustion engine for more powerful acceleration.

Lower fuel consumption

The integrated starter generator actively reduces engine load for lowered fuel consumption, especially in urban driving situations.

The exclusive Volvo XC90 with its subtle jewellery touches and beautifully crafted wheels expresses the essence of contemporary Swedish luxury. On the inside, you are surrounded by genuine materials and fine craftsmanship. It's a sensory experience, further enhanced by the Comfort seats in Leather, our Tailored dashboard and Black Ash decor-all to make the Volvo XC90 your own personal statement of dynamic luxury.

Front Massage Seats - The backrest features ten massage points, with five programs, three speeds and three intensities to choose from. Available for Comfort seats with Perforated Fine Nappa Leather upholstery.

50.8 cms (20 inch) 5-multi spoke
Black Diamond-cut

The power-operated Comfort seats with Leather upholstery and front seat cushion extensions and the exclusive Grey ash & Brown Ash decor add to the sensory experience of contemporary luxury.

The intuitive 31.24 cms (12.3 inch) driver display with four graphic modes.

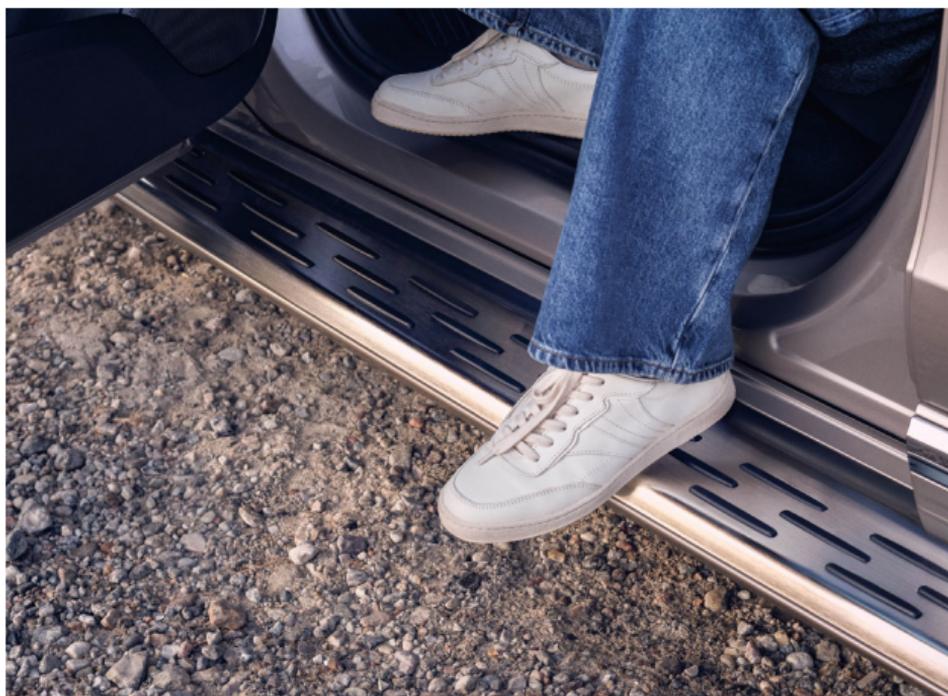

Crystal gear lever knob

WIRELESS PHONE CHARGING

There's a space next to the gear knob where a mobile phone can be stored and wirelessly charged, helping to reduce clutter and make it easy to reach when you need it.

ACCESSORIES
